ASSISTANT SECRETARY AND COMMISSIONER OF PATENTS AND
TRADEMARKS
Washington, D.C. 20231

Paper No:04012005
Application No:10/615429
Filing Date:July 7,2003

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: The limitations of an elevator group assignment controller wherein "costs" are determined based on energy consumption in determining the assignment and wherein the energy use is based on a ration of energy saved/wait time and extra time waiting or the specific formula, is not taught or fairly suggested by the cited art of record..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. This application is in condition for allowance except for the following formal matters:

1. The Abstract of the Disclosure is objected to because "is disclosed", must be deleted . Correction is required. See M.P.E.P. § 608.01(b).

Applicant is reminded of the proper language and format of an Abstract of the Disclosure.

Art Unit: 2837

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 250 words. It is important that the abstract not exceed 250 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said", should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

See line 2.

The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81(c). No new matter may be introduced in the required drawing. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

Examples of drawings are shown in the cited art of record.

The elevator bank / cars must be shown as they are claimed. Examples of flow charts for the algorithm are shown within the cited art.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tyni et al. '776, '852, '264, Ylinen et al., Siikonen, Smith and Brand et al are cited to illustrate similar group assignment controllers which state general cost based on energy consumption but do not teach the specific ratio or formula claimed..

Art Unit: 2837

A shortened statutory period for response to this action is set to expire 3 months from the date of this letter.

Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133
